UT-Tennessee Materials Exchange (TME) <http://www.cis.utk.edu/TME/>

The Tennessee Materials Exchange promotes the beneficial use of material resources, especially those considered to be wastes destined for disposal. It is a free service, operated by The University of Tennessee Center for Industrial Services, that helps Tennessee businesses find markets for industrial by-products, surplus materials and wastes. Material that one company classifies as waste may be raw material to another. The TME lists potentially useful materials, available and wanted, and serves as a matchmaker between those who have materials and those who want them.

UT-Recycling Marketing Directory (RMD) <http://www.cis.utk.edu/RMD/>

Sponsored by the Tennessee Department of Environment and Conservation (TDEC), the Recycling Markets Directory is a database containing information about companies that purchase recyclable materials. To be listed in the RMD, companies simply need to fill out a form with contact information, materials purchased, service area, etc.

**** The Annual Progress Report (APR) for calendar year 2005 is due by March 31, 2006. It may be submitted electronically through Database, Word Document, or by manually completing the printed copy and mailing.**
