

Keep Knoxville Beautiful 2005 Litter Index Results Graphs

Each graph represents a zone or area of Knoxville surveyed for visible litter. Each zone has 5 sub areas designated by street names or a distinct community. In each sub area several streets or blocks are surveyed and given a number rating based on how much litter is visible to the surveyor. Surveyors rate neighborhoods on a 1 to 4 scale with 1 meaning no litter, 2 meaning slightly littered, 3 meaning littered and 4 meaning heavily littered. Keep Knoxville Beautiful places more importance on trends – does the neighborhood have more litter or less litter – than the actual point value. If a neighborhood scores a 3, but had a 3.5 last year that is considered better than a neighborhood with a 2 that had a 1.5 last year.
